

ThermoTool

Heat Gun

2000W

Intend use

This unit is highly versatile electric heat gun which can be used for many different applications, such as:

- Removal of paint
- Defrosting metal water pipes
- Forming and welding plastic
- Shrinking Cable Sleeves
- Drying
- Shrink Wrapping

The heat gun has two settings:

1. Low heat (position 1): for use where the work surface or surrounding must not be allowed to get too hot. Suggested: bending plastic, heat shrinking plastic.

2. High heat (position 2): for faster heat up time of the work surface where you can also operate the gun at a greater distance. Suggested: welding plastic, paint stripping, defrosting pipes, removing vinyl floor tiles, soldering, lighting BBQs.

Technical Data

Model		JSRF-601E-GEM	
Airflow LPM	Stage 1 -150	Stage 2 - 500	
Voltage	(V)	220-240	
Frequency	(Hz)	50/60	
Power	(W)	2000	
Switch position		0 - I - II	
Temperature	position	1	2
	□	300	550
